

# My curriculum vitae

Hi there! As you may already know from my website (<http://david.stadelmann-online.com>), email ([david.stadelmann@unifr.ch](mailto:david.stadelmann@unifr.ch)), letter (**Av. Beauregard 9, 1700 Fribourg**) etc. name is **David Stadelmann**. I was born by my mum on my birthday which is **June 10, 1982** in a small village in **Austria**. Unfortunately I cannot remember any happenings in my life until the age of four. This was when my parents sent me to kindergarten – God was I excited then. Primary school was next, then secondary school which was followed by a higher school of commercial administration where I obtained my **A-Level in 2001** (best possible average). After that I had to do my civil duty in the Austrian **Military**. As I learned **German, English, French, Italian** at school and a little **Serbo-Croatian** and **Bosnian** during a **working experience** in an Austrian bank in Sarajevo and as I was really interested in doing economics, I decided to improve my language skills and my economic capacities at the same time. Therefore I started **bilingual studies** in French and German at the **University of Fribourg** in Switzerland. After a year or so I got really interested in mathematics. Consequently I decided to study **mathematics** next to **economics**. Trust me, maths is pretty tough and the two together are an enormous amount of work. Anyhow I managed to finish my **Bachelor** degree in economics with **summa cum laude in 2005**. One year later in **2006** I obtained my **Master** degree with **summa cum laude**. In fact, I am especially skilled in **statistics, numerical analysis** and **econometrics** as well as special branches in the **political economy** and **public choice**. Of course, I know how to use the main office software and other software related to my research subjects, for example **R, Mathematica, MatLab, SPSS**, etc. Take a look at some of my writings on [http://david.stadelmann-online.com/pdf/0002\\_publications.pdf](http://david.stadelmann-online.com/pdf/0002_publications.pdf). Is there anything left to say? Well perhaps you are interested in the topic of my Master thesis: I tried to find statistically the best driver in Formula 1. OK... that's about it. Should you have any further questions please feel free to contact me. And I almost forgot to mention... of course I have a "[normal CV](#)" too.
